Professional Summary

Front-End Developer with 3+ years' experience building scalable, user-focused applications using React.js, Next.js, Svelte, and modern JavaScript frameworks. Skilled in optimising performance, leading engineering teams, and delivering intuitive interfaces that enhance user experience. Recently expanded expertise into AI agent development using the Mastra framework, architecting intelligent multi-agent systems, and automation workflows. Adept at bridging design and engineering to deliver seamless, high-quality digital products.

Key Skills

- React.js | Next.js | JavaScript | TypeScript | Svelte
 - HTML | CSS | Tailwind CSS
 - Node.js | MongoDB
 - Git | GitHub
 - Mastra AI (agentic workflows & integrations)
-

Experience

Ubuntu Africa — Frontend Developer *(Remote)*

Jan 2025 – Present

Ubuntu Africa is a technology-driven trade and logistics company committed to transforming intra-African commerce through seamless digital solutions.

- Engineered a scalable logistics management system using Next.js, TypeScript, and Tailwind CSS; implemented complex shipment workflows (Sea/Air/Land) that streamlined multi-step coordination and improved tracking accuracy.
- Developed a high-speed PDF generation module utilizing Puppeteer and custom Typescript templates, automating the creation of dynamic, branded invoices and logistics documents.
- Integrated RESTful APIs to handle real-time shipment updates, complex CRUD operations, and optimized data synchronization across a high-performance dashboard interface.

Ovabor Labs — AI Agents Developer *(Remote)*

Jan 2025 – Present

AI startup specialising in automation and intelligent systems.

- Architected AI agents with Mastra, automating 7+ workflows and cutting manual processes by 40%.
- Integrated 10+ external APIs via the Arcade platform, reducing integration time by 25%.
- Designed multi-agent systems enabling autonomous execution and efficient resource allocation.

Enoverlabs — Frontend Developer *(Lagos)*

Aug 2023 – Nov 2023

Tech company delivering digital solutions for SMEs.

- Led a team of 4 engineers, introducing coding standards that cut delivery cycles by 2 weeks.
- Reduced technical debt by 30% through refactoring, achieving 20% faster load times.
- Delivered pixel-perfect UIs in collaboration with designers, enhancing user satisfaction.
- Introduced dynamic UI features that differentiated the product in a competitive market.

Uptick Talent — Frontend Developer (Jos)

Sep 2023 – Dec 2023

Talent solutions platform.

- Translated complex UI/UX into scalable apps using React.js & Next.js.
- Boosted app load speed by 1.5s and improved retention by 18%.
- Built cross-platform applications with React.js, Next.js, and TypeScript, ensuring a consistent user experience across devices.
- Delivered cross-platform apps, achieving 100% responsiveness across devices.
- Collaborated with designers, PMs, and QA to maintain UX consistency.

Education

AltSchool Africa, Lagos — Diploma in Software Engineering (Backend Development)

Sep 2023 – Aug 2024

- Capstone: Developed and deployed **“Eventful”**, a full-stack event management platform with ticketing and real-time features.
- Built with Node.js & MongoDB, including OAuth authentication, RBAC, and optimised queries for concurrent users.

Lagos State University, Lagos — Diploma in Business Administration

Mar 2019 – Apr 2022

- Graduated with a GPA of 4.6.
- Led research project on *“The Impact of External Environment on Small Scale Business Performance in Lagos State.”*

Achievements & Professional Development

- 2nd Place, Frontend Development Competition (32 participants) — Dominion Computer College
- Certificate of Appreciation for teaching web development at a local NGO
- Active contributor to open-source projects and personal development portfolio
